*Software Engineer with 3+ years of experience as a **front end developer**. Currently working at DataPOEM. Crafting diverse user interfaces leveraging NextJS and React. Worked on login, authentication screens as well as dashboards tailored for analytics clients. Solved 250+ Questions on LeetCode.*

PROFESSIONAL EXPERIENCE

DATAPOEM

Front-end Developer

Bengaluru

July 2023–Present

- Implemented changes to the **webpack** and nginx configurations resulting in a **Lighthouse** performance metric improvement from **54 to 72 (33%)** for an existing Vue app.
- I streamlined authentication for our internal tools web app by using **Next-Auth**. Successfully integrated **Azure-AD** login functionality into Vue App, leveraging the **MSAL library** reducing the authentication related tickets by 90%.
- I spearheaded the creation of a comprehensive **UI library** using `shadcn/ui` within an Nx Monorepo. My focus on accessibility was central to this project, ensuring usability for all.
- Resolving bugs and introducing new functionalities to an existing Vue2-based web app.

ACCENTURE

Application Development Analyst

Mumbai

January 2021–July 2023

- Developed and maintained a high-traffic search tool, significantly improving user experience and efficiency for **thousands of daily users**, boosting platform engagement.
- Optimized dashboard code and introduced widgets, **slashing load times by 23%** and significantly boosting overall performance.
- Collaborated with the client's design team to convert wireframes into efficient and accessible user interfaces, significantly improving user experience, satisfaction, and project success.
- Created a React starter kit that expedited Accenture client onboarding, reducing setup time and boosting time-to-market and client satisfaction.
- Maintained and updated various website sections using **React, AngularJS, Javascript and Sass**, significantly enhancing user experience with a consistent, polished interface, leading to a 20% increase in user engagement.

KONNECTIONS INDIA

Junior Software Developer (Intern)

Mumbai

January 2019–February 2019

- Konnections is a service based startup which also has a product called Jewelzie.
- Consumed Unsplash API to populate a MySQL DB with Images to be used by an android wallpaper app.

PROJECTS

Nextflix - Netflix clone

[github](#) [web](#)

- A web app using NextJS, **ReactJS** and Hasura GraphQL.
- It uses the youtube API to show the videos.

Library Management System using NodeJS

[github](#)

- A web app using NodeJS, Pug and MongoDB.
- It can be used by the librarian to track books, genres and their authors.
