Mumbai, 400099 | +91-9867306334 | maninaik111@gmail.com | maninaik.in | Linkedin | Github | LeetCode

*Software Engineer with 3+ years of experience as a **front end developer**. Currently working at DataPOEM. Crafting diverse user interfaces leveraging NextJS and React. Worked on login, authentication screens as well as dashboards tailored for analytics clients. Solved 250+ Questions on LeetCode.*

PROFESSIONAL EXPERIENCE

DATAPOEM — Bengaluru
Front-end Developer — *July 2023–Present*

- Implemented changes to the **webpack** and nginx configurations resulting in a **Lighthouse** performance metric improvement from **54 to 72 (33%)** for an existing Vue app.
- Successfully integrated **Azure-AD** login functionality into Vue App, leveraging the **MSAL library**. Additionally, I streamlined authentication for our internal tools web app by using **Next-Auth**.
- I spearheaded the creation of a comprehensive **UI library** using shadcn/ui within an Nx Monorepo. My focus on accessibility was central to this project, ensuring usability for all.
- Resolving bugs and introducing new functionalities to an existing Vue2-based web app.

ACCENTURE — Mumbai
Application Development Analyst — *January 2021–July 2023*

- Developed and maintained a high-traffic search tool utilized by **thousands of users** daily, resulting in improved user experience and increased efficiency.
- Enhanced dashboard performance by implementing widgets and optimizing code, resulting in faster load times and improved overall performance.
- Collaborated with the client's design team to convert wireframes into efficient and accessible user interfaces, ensuring seamless interactions and design guideline adherence.
- Streamlined onboarding for new Accenture clients by creating a React starter kit, expediting project kickstarts.
- Maintained and updated various website sections using **React, AngularJS, Sass, and HTML** to ensure a consistent and polished user experience.

KONNECTIONS INDIA — Mumbai
Junior Software Developer (Intern) — *January 2019–February 2019*

- Konnections is a service based startup which also has a product called Jewelzie.
- Consumed Unsplash API to populate a MySQL DB with Images to be used by an android wallpaper app.

PROJECTS

Nextflix - *Netflix clone* — github web
- A web app using NextJS, **ReactJS** and Hasura GraphQL.
- It uses the youtube API to show the videos.

Library Management System using NodeJS — github
- A web app using NodeJS, Pug and MongoDB.
- It can be used by the librarian to track books, genres and their authors**.**

Marksheet Viewer in PHP
- Developed a web application through which the students can see their term test marks by logging into the site.
- It has an admin login, which allows the admin to enter marks for specific students.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java.

Technologies: React, Next.js, Tailwind CSS, React Query, Yarn, Webpack, Git, Postman.

EDUCATION

Atharva College of Engineering — Mumbai
Bachelor of Engineering in Information Technology, — *August 2016 - October 2020*
(GPA: 7.29/10.0)
